Building AEM Components from HTML Mockups

Tyler Maynard
AEM SOLUTIONS ARCHITECT

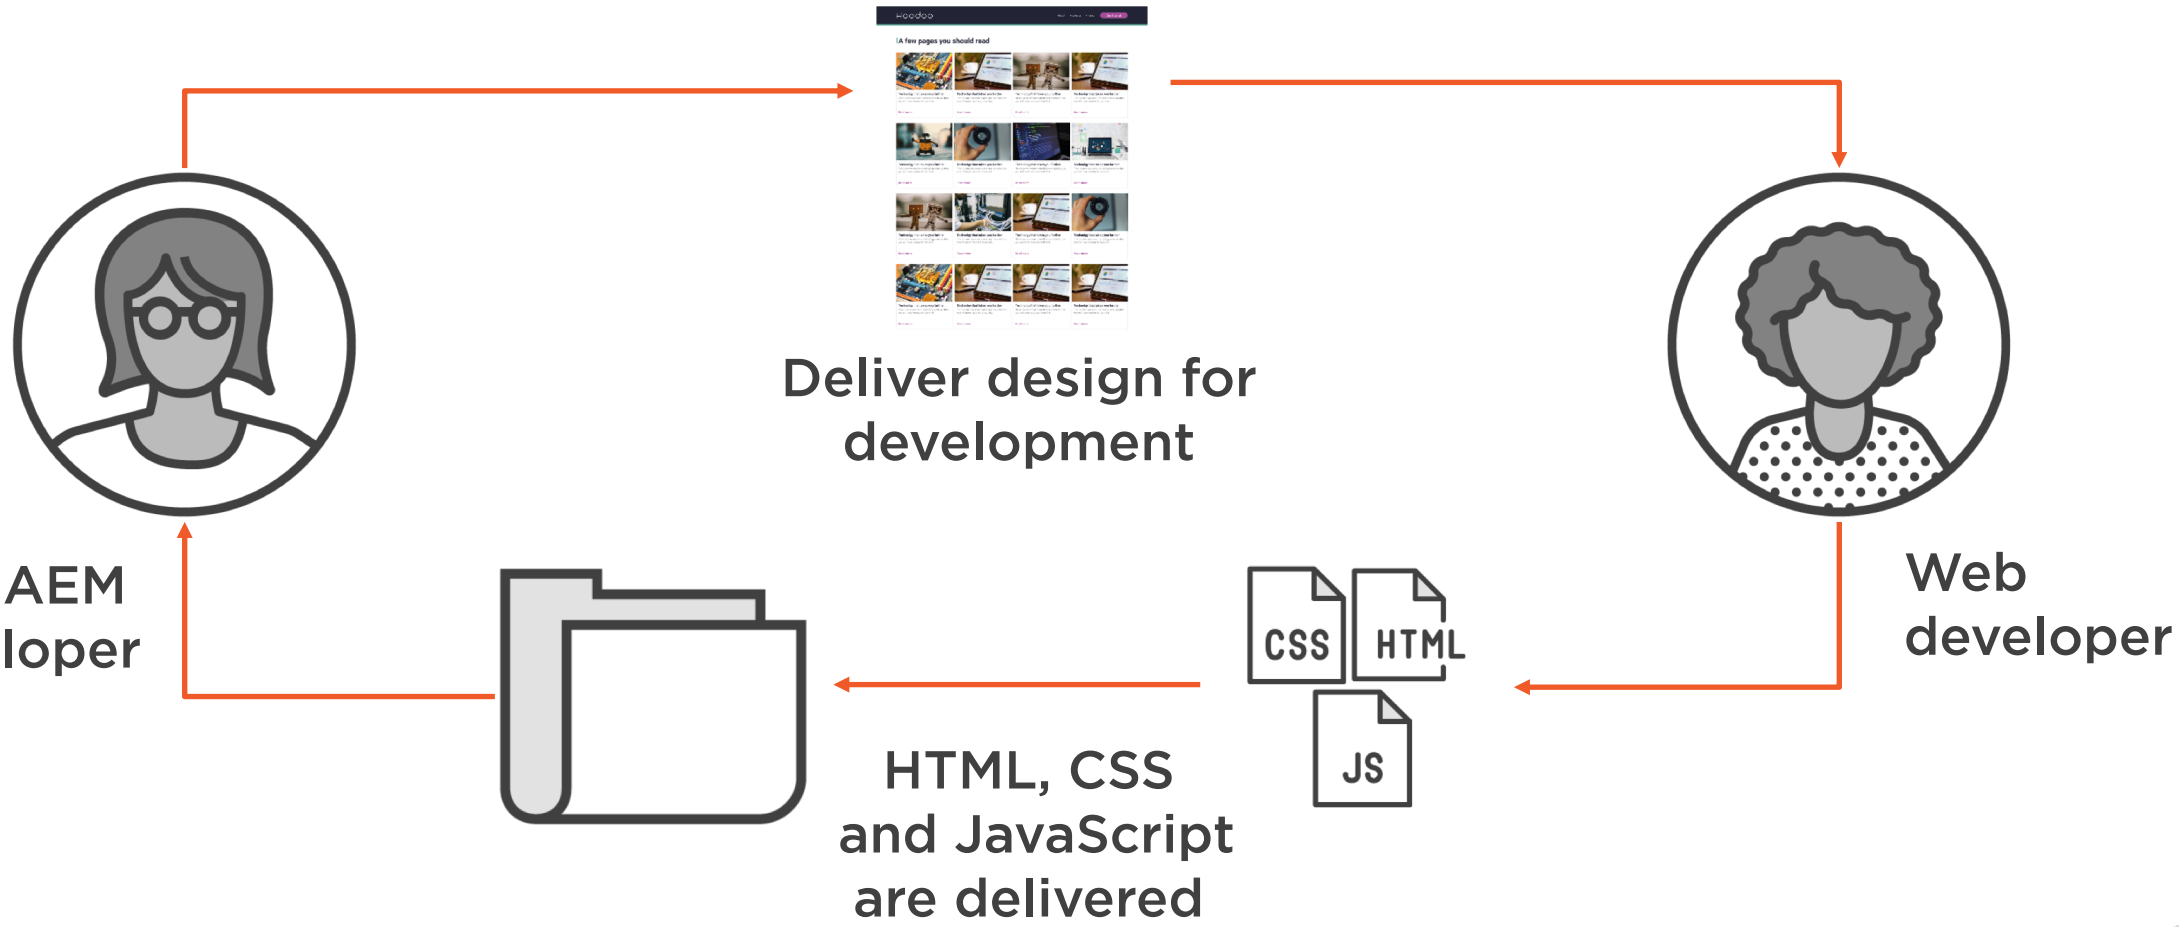
@TylersDesk www.aembits.com

Overview

- Investigate returned HTML mockups
- Build the article feed component
- Build client libraries and add CSS and JS
- Embed client libraries

Continuing with the Development Scenario

Web Developer Workflow



Demo

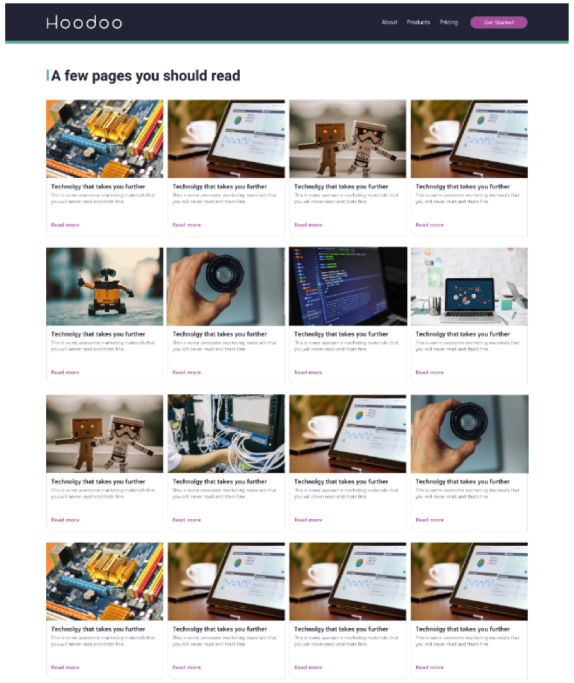
Review experience delivered

Investigate the markup of the mockup

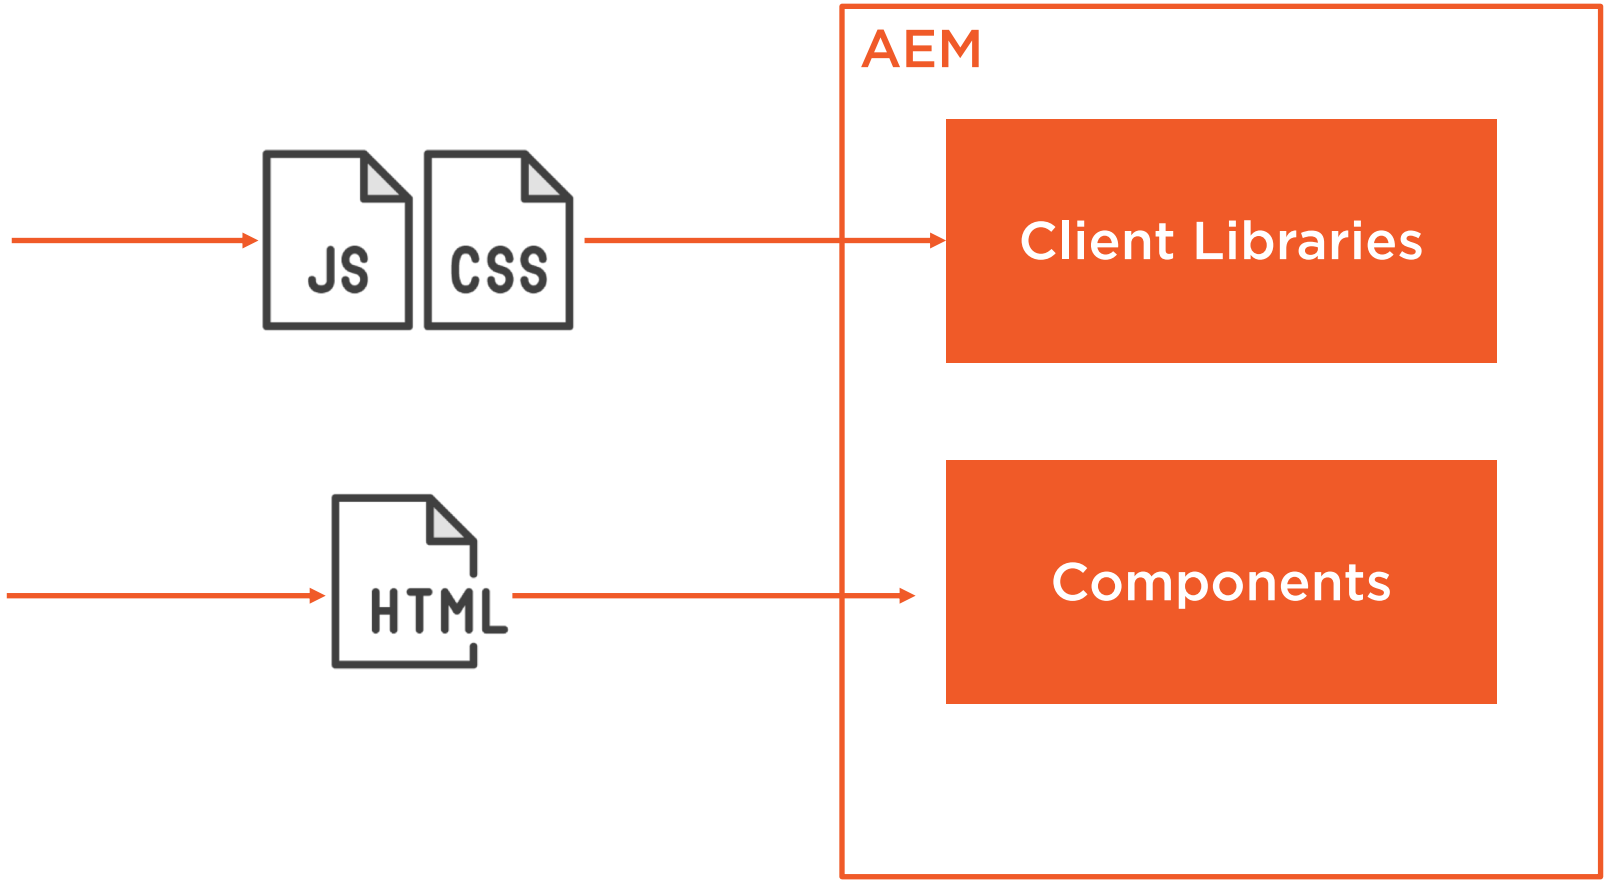
Determine what is needed in the component

Building the Article Feed Component

Mockup to AEM Breakdown



HTML mockups



Demo

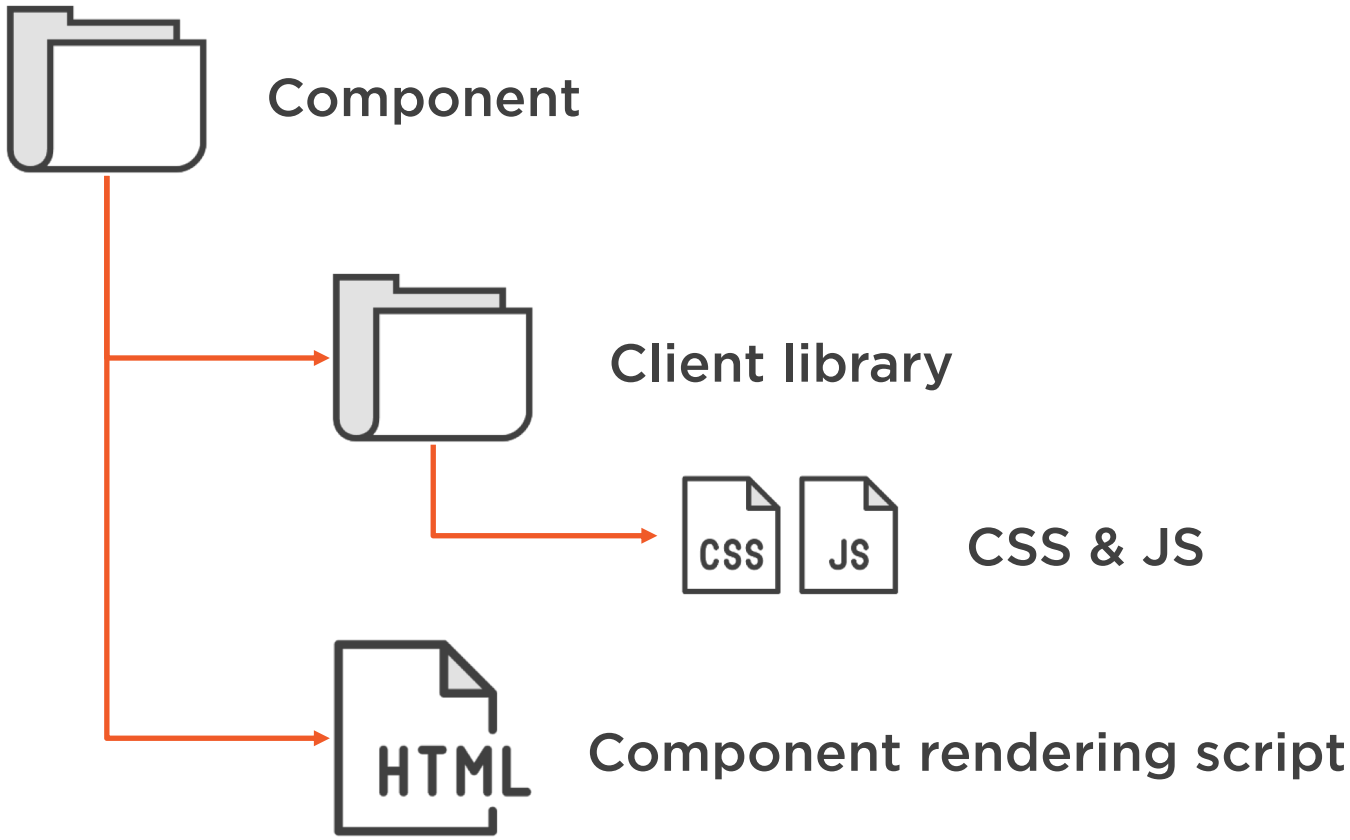
Add component to project

Copy the markup from the mockup

Add a dialog to select a path/page

Adding CSS and JS to the Component

Client Library and Component Best Practices



Demo

Add a client library

Add CSS and JS

Give the client library a category

Embed the Article Feed Client Library

Embedding Client Libraries

Demo

Find the main site client library

Embed the client library to load on the page
